vector bundles and their applications - vector bundles. basic algebraic notions involved in describing and calculating k -theory are studied and the particularly interesting field of applications to the theory of elliptic pseudodifferential operators is included. the exposition finishes with further applications of vector bundles to topology. certain aspects **vector bundles and their applications - springer** - vi vector bundles and their applications 3.6 relations between complex, symplectic and real bundles 160 4 calculation methods in k -theory 169 4.1 spectral sequences 169 4.2 operations in k -theory 179 4.3 the thom isomorphism and direct image 185 4.4 the riemann-roch theorem 189 5 elliptic operators on smooth manifolds and k -theory 195 5.1 symbols of pseudodifferential operators 195 **vector bundles on reducible curves and applications** - clay mathematics proceedings volume 14, 2011 vector bundles on reducible curves and applications montserrat teixidor i bigas 1. introduction let c be a projective, irreducible, non-singular curve of given genus g , 2 defined over an algebraically closed field. **some applications of vector bundles in algebraic geometry** - vector bundles can be thought of as vector spaces varying continuously along a given variety. these geometric objects offer a valuable point of view on algebraic geometry, and represent the technical core of this work. the first example of vector bundles that we will encounter are logarithmic **generically nef vector bundles and geometric applications** - generically nef vector bundles and geometric applications 3 (5) an irreducible curve c is called movable, if $c = ct_0$ is a member of a family (ct) of curves such that $x = s$ the closed cone generated by the classes of movable curves **extensions of vector bundles on the fargues-fontaine curve** - these applications are the subject of a companion paper by one of us [han17]. 1.1. statement of results. before stating our results, we briefly recall the classification of vector bundles on x . a more extensive discussion of this and related background will be given in §2. theorem 1.1.1 (fargues-fontaine, kedlaya).
